

**Westhampnett Parish Council**

**Briefing Note for Meeting 9<sup>th</sup> March**

**Rolls Royce planning application ref WH/26/00381/FUL**

**Installation of additional drainage infrastructure and associated planting within  
attenuation basin approved via 23/01855/FULEIA**

- 1.1 This application is for a change in the drainage and planting due to the higher groundwater level than previously anticipated due to the high rainfall than average.
- 1.2 The change is that the approved swale on the eastern boundary will have a deeper channel dug with increased planting around the edge. There is no change in the upstream surface water network.
- 1.3 A copy of the drainage statement is attached.
- 1.4 The application follows discussions with CDC.
- 1.5 As this will slow down and retain surface water during surges, this will have a beneficial effect.

**PC Recommendation : No Objection**
